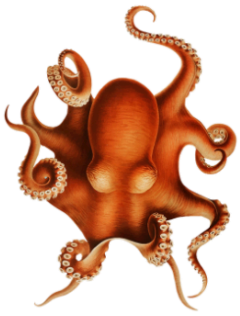
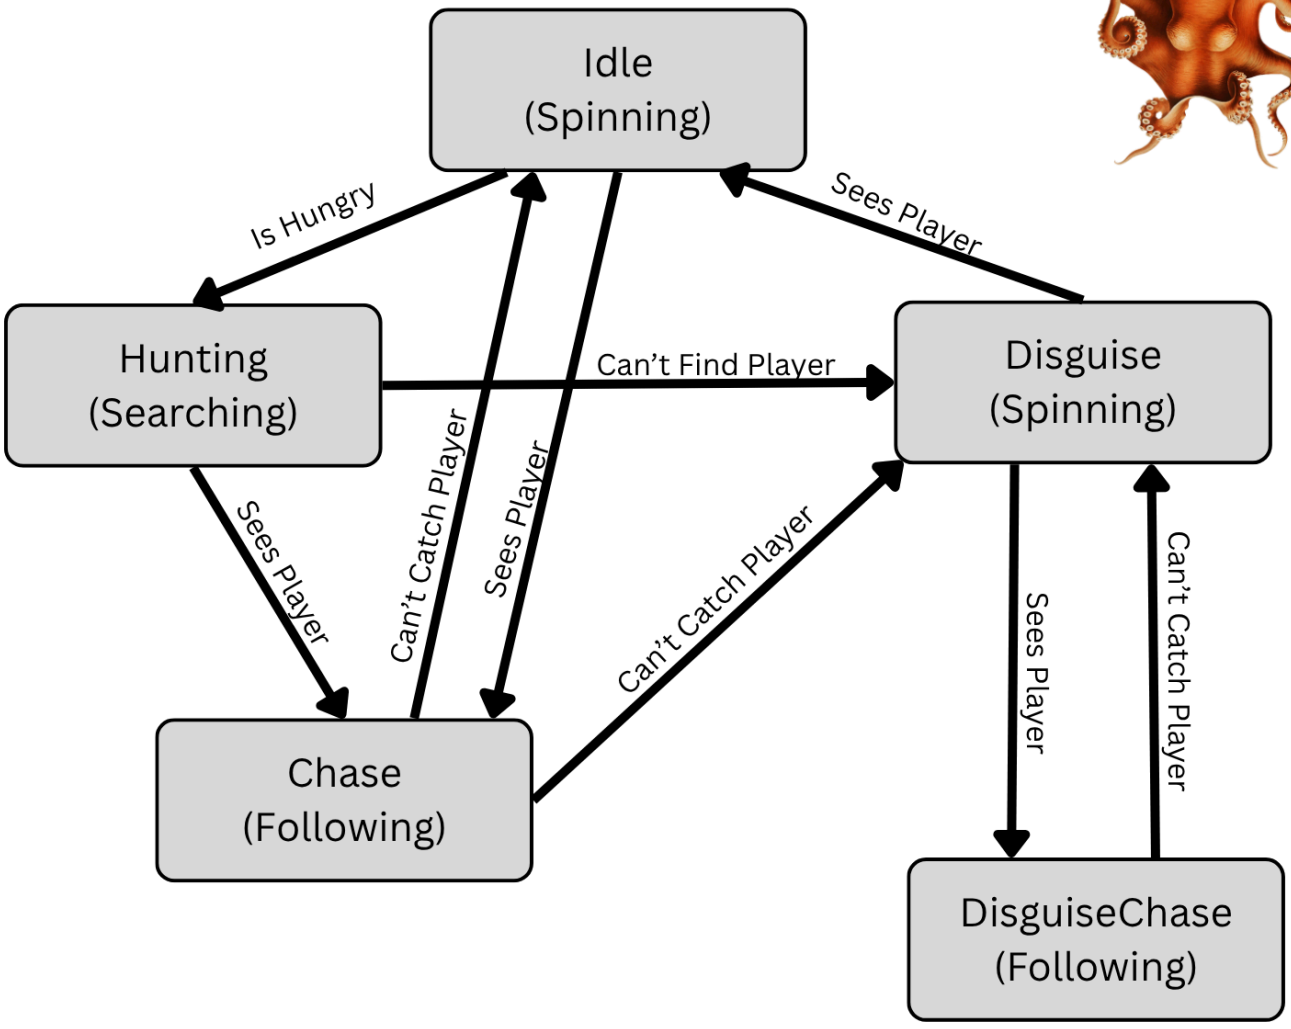
Octopus Finite State Machine





State Descriptions

Idle: The Octopus spins around searching for the player with it's vision cone
Hunt: The Octopus roams along a set path looking for prey
Chase: The Octopus has spotted the player in it's vision cone and moves towards them in a direct path
Disguise Chase: The Octopus has sporrted the player in it's vision cone while disguised and moves towards them in a direct path, slower and at 10% opacity
Disguise: The Octopus goes to 10% opacity and spins around searching for the player with it's vision cone

Implementation Challenges

- It was difficult to fill the space properly with Octopi
- Using markers and a system where each Octopus follows a set path made by setting up invidual markers
